

In safety-razors, a hollow metallic blade-holder having a preferably removable handle and a flat plate in front, to which the blade is attached by clips and a pivoted catch, said plate having bars or teeth at its lower edge, and the lower plate having an opening, for the purpose set forth.

In testimony that we claim the foregoing

we have hereunto set our hands this 5th day of May, 1880.

FREDERIC KAMPFE.  
OTTO F. KAMPFE.

Witnesses:

GILBERT J. MCGLOIN,  
HENRY S. REIS.
